A second photography session on the Buseu reed where you will spend hours and hours in silence with your camera to take a close-up photograph of the majestic vulture, the black vulture, the vulture and the common vulture. Also from the 4x4 and on foot we will go out for a photo safari of Iberian deer. And finally, when everything is calm, we will go out to photograph the stars with the accompaniment of a professional in night photography.

Over these few days, we will be accompanied by a guide and wildlife specialist who will help us to capture the most spectacular images of nature. Get your lens and your rucksack ready!
